Motivated recent General Assembly software engineering graduate seeking to join a forward-thinking company, bringing knowledge of React, C#, JavaScript, CSS, HTML, and Python as well as a desire to learn new skills. I am an agile and team-oriented individual looking to put my excellent communication skills and analytical approach to problem-solving to use in order to contribute to the company's growth.

Skills:
Languages - JavaScript, C#, HTML, CSS, Python, SQL
Libraries and Frameworks – React, Express.js, Bootstrap, React.js, Node.js, Mongoose
Tools/Technologies: Git/GitHub, RESTful APIs, MongoDB, PostgreSQL, Heroku, Firebase, Unity Engine
Languages Spoken: English, Portuguese, and Spanish

Project Experiences

Tourist Travel Guide App   **June 2022**
- A web software that allows users to build new places they have visited and share them with others who have logged in.
- App using JavaScript, HTML, CSS, Express, React, deployment with Heroku

2d RPG Game   **July 2022**
- Application utilizing JavaScript, HTML, and CSS, with artificial intelligence and a board game that creates random algorithms.
- A game in which the player must avoid all adversaries and run to the end without losing any of their three lives.

Electronic Medical Record   **August 2022**
- Application utilizing JavaScript, HTML, CSS, Bootstrap, Express, and React, and deployment with Heroku
- An app that allows healthcare providers to see their patients, manage their therapies, and prescribe medications.
